# AFAM AlarmTech App

## Benefits include:

- Works with all 3 fire monitoring companies:
  - Automatic Fire Alarm Monitoring (AFAM)
  - Alarm NZ
  - Johnson Controls Fire Monitoring (formerly ADT)
- Single combined 'off normal' list across all your systems
- Alerts can be configured to override phone defaults (such as silent mode)
- Customizable alerting schemes. Pick from a set of defaults or customize
- Android 7.0 and later (iOS version in development)
- Works in conjunction with existing SMS/Email messaging, or can be used to replace it
- On call functionality where you can see who on your team is on call
- Mobile network information to help with commissioning and troubleshooting
- Direct access link into Solomon for AFAM systems

## The future of monitored fire alarms for technicians.

We've developed the Technician App to give you visibility of what's happening across the fire alarm systems you maintain and show you alerts, regardless of whether they're monitored by us or our competitors.

The app contains a large number of features.

MONITORING

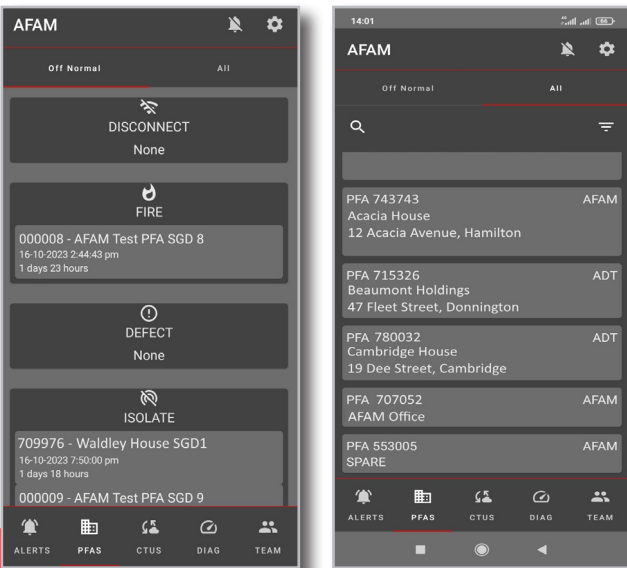

## How to install the App

The app can be downloaded and installed from the Android Play Store. The iOS version is currently in development. To download the Android version, go to the Play Store on your phone and search for 'afam alarm'. You'll see the app in the list of results.

Download and install it then contact us on **03 341 0464** and we'll walk you through the rest of the process and what's required to configure the messaging for the other monitoring providers.

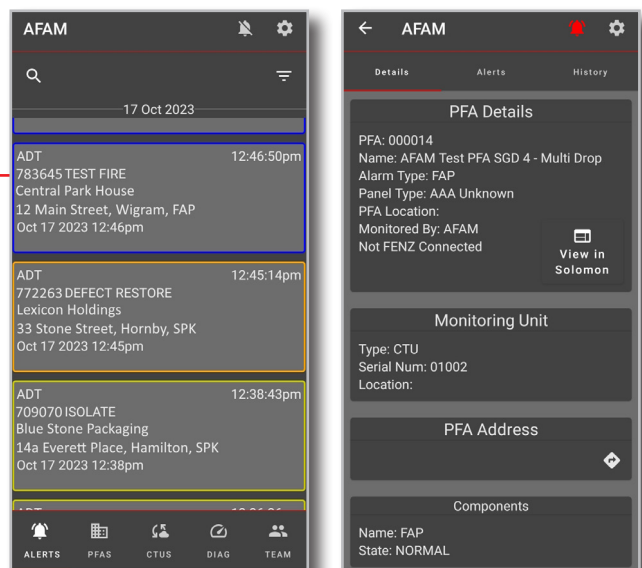

## Functionality Overview

### The PFA section of the app contains:

- PFA Off Normal List - Single list showing all off normal from the 3 monitoring companies.
- PFA List – List of all known PFA's with further information

### Alerts

This contains information about alerts that have been received.

### CTUs

This section of the app contains information about the known AFAM CTUs. This includes:

- CTU Off Normal List – listing any off normal conditions
- CTU List – List of all known CTU's

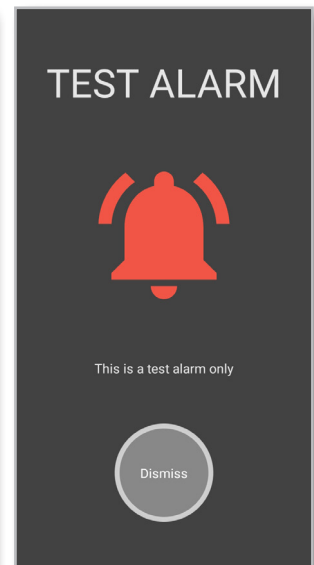

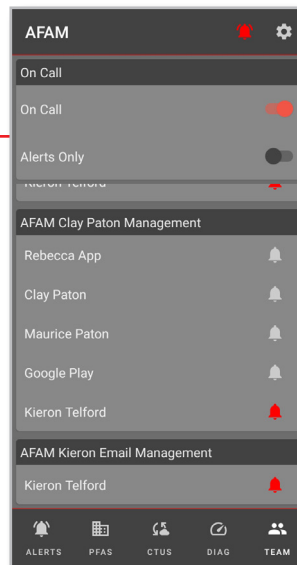

### Diagnostics

This section of the app contains information about the cellular network including coverage maps and cellular network signal strengths.

### Team

In this section of the app you can control who's on call and who will receive alerts.
